il tissue di qualità

PROFESSIONAL LINE

# Our History

Tradition and innovation at the service of quality

A history of over **30 years of experience in the tissue sector**.

A constant technological research and a continuous commitment to a model of sustainable development.

A process with vertical integration from the paper mill to the transformation lines able to offer specific solutions for all environments.

A quality policy that allows the selection of certified materials that comply with high quality standards.

A dedicated attention to customer satisfaction.

**Paperdi** is the tissue of quality, the synthesis of experience and innovation.

A company that makes its values the real strength and synthesizes them in every choice.

**Research**

**Innovation**

**Certified Quality**

**Sustainability**

# Our Key Numbers

Performance and growth in numbers

We produce tissue paper articles, pursuing a development model capable of reconciling business growth with customer satisfaction, the creation of economic value and the protection and protection of the environment.

Our mission has always been to offer the right card for every use.

# Sustainability

Green footprint

**Green footprint** and sustainability, success story based on experimentation, innovation, respect for the consumer, the environment, workers, stakeholders all. Paperdì is not only concerned with offering finished products that have certified quality characteristics.

The love for nature, which has always led it to offer certified products on the market, is combined with respect for the environment and ensures that the entire value chain is absolutely and totally sustainable. We refer to the attention

paid in the choices regarding internal and external logistics, packaging,

The continuous attention and promotion of research and development activities, the collaboration with bodies that certify the products and protect the integrity and transparency of information.

# Sustainable Project

Research and development

1

## ALL IN PAPER

Our primary objective has always been the protection of the environment and the low environmental impact of Paperdi products finds maximum expression in the ALL IN PAPER project. An important research and development project that sees as its protagonist the conversion of all the packaging of our Z-folded towels from plastic to paper to obtain a zero-waste product.

The first important little step for a future ALL IN PAPER

## NO TOUCH - NO WASTE

**Soavex professional:** a new project that summarizes the attention to the environment and to our customers. A dispensing system that guarantees the reduction of waste and ensures the total hygiene of the service to the consumer.

2

3

## LOW ENVIRONMENTAL IMPACT

Our products are designed to optimize the environmental impact even in the handling and transport of goods:

the "LOW ENVIRONMENTAL IMPACT" attests to the commitment made by Paperdi in the creation of increasingly compact packaging, thanks to innovative solutions in terms of packaging and palletizing.

# Certifications

Certified commitment to a sustainable future

## ISO 45001

Is the international ISO standard for occupational health and safety management systems (SGSSL). The 45001 has the ultimate goal of helping companies provide a safe and healthy work environment for their employees and all those who visit the workplace. This goal can be achieved by controlling the factors that could potentially cause injuries, illnesses and even death and requires organizations to continuously improve, thus providing all stakeholders with the guarantee of compliance with the specified safety policies.

## ISO 9001

Is a voluntary international standard that defines the requirements of a quality management system, in order to conduct business processes following codified work procedures to ensure the constancy of production and management processes and to contribute to their continuous improvement, all oriented to ensure customer satisfaction.

## ISO 14001

Is a voluntary international standard aimed at certifying the Environmental Management System of organizations, which are committed to evaluating and improving their environmental efficiency in terms of continuous improvement of performance in a consistent, effective and sustainable way, to carry out a careful control of the environmental impacts of their activities, to involve their employees and monitor their performance ensuring compliance with their environmental policy.

## SA 8000

Social Accountability SA 8000 is a voluntary global standard that commits organisations to control, including their supply chains, triggering a virtuous circle throughout the supply chain. Companies adhering to the standard commit themselves to comply with the rules on work ethics defined by the world's leading organizations for the protection of human rights and labour. The guiding principles of the standard are the conventions of the ILO (International Labour Organization) and the UN Conventions on the Rights of Children and on Human Rights. The standard provides transparent, measurable and verifiable requirements to implement and certify corporate performance in 9 key areas: child labour, forced or compulsory labour, health and safety, freedom of association and collective bargaining rights, discrimination, disciplinary practices, working hours, pay and management system.

## EMAS

The EMAS certification represents the official recognition of the achievement of excellent performances. The objective of EMAS is the continuous improvement of environmental performance implemented voluntarily and independently of the legal limits, which are in any case taken as minimum reference parameters.

Il marchio della  
gestione forestale  
responsabile

## FSC

The FSC® mark identifies products containing wood from forests managed correctly and responsibly according to strict environmental, social and economic standards. The FSC® ensures that the forest of origin has been independently controlled and evaluated in accordance with these standards (principles and criteria of good forest management), established and approved by the Forest Stewardship Council®

## ECOLABEL

EU Ecolabel is the ecological certification, on a voluntary basis, which certifies that the products, during their entire life cycle, comply with strict environmental protection criteria common to all the countries of the European Union.

Consumer Products

CERTIFIED

## BRCS (GLOBAL STANDARD FOR FOOD SAFETY)

The BRC Global Standard for Food Safety was created in 1998 to guarantee that branded products are obtained according to well-defined quality standards and in compliance with minimum requirements. The requirements of the standard relate to the quality management system, HACCP system and relevant prerequisite programs, including GMP (Good Manufacturing Practice), GLP (Good Laboratory Practice) and GHP (Good Hygiene Practice) requirements. Certification to the global standard includes the evaluation of a company's premises, operating systems and procedures. Maintaining certification requires adherence to the latest version of the standard, which is reviewed regularly.

## GO

The Guarantee of Origin (GO) is an electronic certification that guarantees the renewable origin of the sources used by certified plants.

For each megawatt hour (MWh) of renewable electricity fed into the grid by these plants, the Energy Service Manager (GSE) issues a title which is called GO (Guarantee of Origin). The Guarantee of Origin corresponds to a supply of energy from a sustainable source that covers the consumption of customers. To ensure that the consumptions made correspond to the quality of sustainable energy purchased, a procedure called Deed of cancellation is carried out at the GSE, the Energy Service Manager.

# Our Commercial Range

Quality and softness for every need

## PROFESSIONAL LINE

PROFESSIONAL PRODUCTS

NO-TOUCH DISPENSING SYSTEM FOR PROFESSIONAL USE

## BRICO LINE

PRODUCTS FOR MIXED USE HOME/PROFESSIONAL BRICOLAGE, DO IT YOURSELF, GARDENING

## CONSUMER LINE

HOUSEHOLD PRODUCTS

# Our Embossing

Design and functionality in every detail

## MICRO

Is the standard for the professional sector. A set of points without particular shapes: a product characterized by the absence of decorum.

## LOZENGE

For rolls and for handtowel, to the simplicity of micro embossing is added a characterization that does not compromise the quality of the product.

## ZEN HYGIENIC AND ZEN TOWEL

Textures designed to obtain the maximum possible volume.

## THE EMBOSSED MESH

Is designed to give the product the best possible "tactility" and is not suitable for bulky products.

# AVANeco

## The new brand by Paperdi.

A territorial networking project which was born with the aim of producing raw materials at its own paper factories from the processing waste of the box factories with which there are partnership relationships, located mostly in Campania.

### Keyword **SUSTAINABILITY**

A totally **PLASTIC FREE** project: from the box to scotch until the packaging of the package: No to undifferentiated waste.

**ECOLABEL AND FSC CERTIFIED SUSTAINABILITY:** from the certification of the product to the raw material up to the packaging.

**HAVANA PAPER:** raw material made from packaging recycling.

**SUPER COMPACT PACKAGING** for a choice with low environmental impact even during transport and handling.

### **OUR OBJECTIVES:**

Promote a circular economy of the supply chain through the reuse of by-products deriving from "pre-consumption" and "post-production"

Create a complete range of "ecological" products for hygienic uses with low environmental impact

Consolidate partnership relationships with its paper packaging suppliers by promoting common awareness of environmental protection

Reduce the environmental impact as a result of supply logistics within a predominantly local territorial area

So green, **PLUS white**

**The new brand by Paperdi**

*The innovative EcoGreen Plus range combines the high performance of pure cellulose with the sustainability of recycled paper.*

**Whiteness degree, softness and resistance** are the characteristics of the line produced **100% with recycled raw materials** coming for more than 50% from pre-internal consumption and for the remaining part from post-reconditioned consumption. Thanks to a **KMO circular supply model** based on the end of waste and the increase in the percentage of material coming **from**

**internal pre-consumption**, the EcoGreen Plus range optimizes the logistic processes of the raw material, with a consequent impact on transport-related CO2e emissions.

In addition, the **PLUS** line maintains a **high uniformity** despite the variability of the raw material thanks to a careful and scrupulous selection of processing materials.

## *Innovative Features*

**Territorial networking strengthening**

**Activation of a circular economy model at KMO**

**Degree of whiteness obtained without bleaching agents or dyes**

**Optimisation of logistics processes through proximity, resulting in impact on transport-related CO2e emissions**

**Use of by-products from pre-consumption**

**Exploitation of post-consumer products**
